New approaches
to contract manufacturing
for your flexible materials.

Thinking creatively.

Slitting • Spooling • Printing • Laminating • Die Cutting • Specialty Extrusion • Assembly • Packaging • Supply Chain Management

Web Industries is an industry leader in providing contract manufacturing services for flexible materials – from slitting, spooling, printing, laminating, die cutting, specialty extrusion, assembly and packaging to complete supply chain management solutions.

Chances are, there's no shortage of good ideas in your company. The challenge is getting those ideas off the drawing board and into the market – and fast.

However, you may not have the in-house expertise needed to define and develop a manufacturing process. You may be worried about the cost of ramping up production and the go-to-market delays it would cause. And, more importantly, what those delays could mean to your bottom line.

If your new product seems like it's posing more problems than potential, it's time to talk to Web Industries.

As an industry leader in contract manufacturing services for nearly 40 years, we have a long history of applying our expertise, innovative thinking and creative problem solving to help speed time to market, drive costs down and continually improve processes to maximize your success.

Acting quickly.

Faster time to market • Decreased costs • Scalable models for success

“We created a new wiring paradigm, which required a complete rethink of how wire would be built. Teaming with Web Industries enabled us to progress from a dream, to a vision, to a commercial wiring system for the next hundred years.”

- Robb Sexton, President
Flatwire Technologies Division,
Southwire Company

The first step to thinking innovatively is listening intently. That's why we work closely with you from the start to discover your unique needs and project requirements, as well as the underlying economics and timeframes. In this way, we gain a full understanding of both the big picture and the small details involved in moving your solution forward from prototype to full production.

Combining your talents and expertise with ours, we tackle your manufacturing challenges head on to quickly overcome barriers – from technical and operational issues to logistic and materials concerns – to create a tailored solution that's right for you.

The value to you is having both a partner and a problem solver there to approach your challenges in ways you may not have thought of before, and for a fraction of the time and cost.

Building confidence.

An employee-owned company • Invested in your success

Listen. Create. Deliver.

From **listening** to your challenges, to **creating** a solution and **delivering** the results you need, Web Industries can take the worry and the wait out of your manufacturing processes.

Don't feel like you have to do it all. Focus on what you do best and let Web Industries do the rest. You can depend on us to solve problems creatively, so you can think freely.

Web Industries is recognized for its operational excellence and commitment to quality. Whether you need us to design a manufacturing process for a component, a sub-assembly or a complete turnkey product, or manage your entire supply chain, we work diligently every day to earn your trust.

We leverage proprietary state-of-the-art manufacturing systems and best practice methodologies, employing electronic documentation processes for full lot traceability and strict quality control. Multiple manufacturing locations provide a dependable solution for business continuity for added peace of mind, as well as reduced freight costs.

As an employee-owned company, we are committed to the satisfactory outcome of your project and are invested in its success. Many of our employees have been with us for over 20 years, bringing a high level of stability and consistency to your projects and your relationship with us.

All our facilities are ISO 9001:2008 certified, and our Hartford facility is ISO 13485:2003 certified.
