

SPOOLKIT™

Customized Formatting, Packing, and Fulfillment Services For Aerospace Fabricators

Challenged to build faster and more affordably, commercial aerospace companies are looking to streamline manufacturing processes and shorten supply chains. Web Industries' SpoolKit™ services support both of those goals.

An integrated set of material management, converting, quality assurance, and packaging services, the SpoolKit process combines pre-production formatting with specialized fulfillment solutions. These deliver customized materials like composite slit tapes, ply kits, and laminates tailored to the customer's workflow and ready to go from the receiving dock to the assembly floor.

By minimizing non-value-add ordering, converting, inventory, and tracking activities, **SpoolKits simplify the business of doing business for aerospace and space companies.**

PRIMARY BENEFITS

- Simplified ordering and tracking lowers supply chain transactional costs
- Optimized slit tape spools for automation and ply kits for hand lay-up provide everything needed for efficient production
- Minimized storage and testing requirements increase available production floor space
- Integrated environmental sensors ensure material safety and traceability
- Reusable packaging and delivery carts reduce waste and deliver point-of-use solutions that enhance manufacturing activities
- Rigorous demand planning and quality assurance systems decrease overall risk
